Optical Fibre Cables

Aerial

» All Dielectric loose tube aerial cables - suitable for short or long span applications independent of electrical network. Designs are matched to your span and environmental conditions.

» Up to 288 fibres.

Direct Buried

» Suitable for direct burial and applications requiring additional mechanical or rodent protection. Available in metallic armour or light armoured options as well as non-metallic robust designs.

» Up to 864 fibres.

Duct

» Suitable for outdoor duct installations (HDPE Tubes) by cable blowing or pulling. Available with additional glass yarns for rodent protection or with toughened tubes for enhanced mechanical performance. The MiDia designs are smaller in diameter than the Standard design range.

» Up to 864 fibres.

Microduct

» Suitable for outdoor installation into microducts by cable blowing. The MiDia Micro designs are available in various size options to optimise duct fill, offering greater capacity for fibre density.

» Up to 576 fibres.

Drop

» A variety of designs exist for various last drop installations. Designs suitable for direct burial, duct, indoor/outdoor or short span aerial applications are available.

» Typically 1 to 12 fibres.

CPR Related Cables

» Cables with CPR ratings up to Cca or B2ca exist for a variety of indoor and indoor/outdoor applications. Designs vary from loose tube, central core and buffered optical fibres to best suit the installation environment and fibre count required.

» Up to 6912 fibres

Rollable Ribbon Cables

» Cables with the latest Rollable Ribbon technology are available for outdoor Aerial, Direct Buried, Duct, Microduct, Drop, and Indoor applications. The design is optimised for the application.

» Up to 6912 fibres.

Connectorised Access Solution (FTTH)

High versatility Access network

- » Minimal optical infrastructure;
- » Optimal transition solution for a splicing network migrating to a connectorised network (field connectors);
- » Segmented network, allowing more security and stability;
- » Flexible design and quick subscriber activation.

Pre-terminated solution on-demand for FTTH Networks

Solution benefits

Pay as you grow
Capex and Opex
reduction.

Plug and play
preterminated
solution.

Factory
assembled hardened
connectors.

Increased reliability
with factory
preterminated
products.

Decreases the cost
of labor, installation,
optical splices and
accessories.

Quick
Installation.

1st Level Splitter
PRETERMINATED
SlimBox DROP
TERMINAL FK-
CTOP-16P (INLINE
SLIMCONNECTOR)

» The EZ!Star solution is intended for outdoor residential network architecture (FTTH). With factory pre-terminated systems, it offers easy installation, quick activation and flexibility upon expansion.

DID YOU KNOW...

That global fixed broadband subscribers continues rapid growth, expected to hit 1.2 billion by 2025?

EASYFIBER

Centralised Building Solution (MDU)

- » Centralisation of splitters and connection maneuvers of subscribers;
- » Quick activation process;

- » Connectorised solution;
- » Optimal splitter usage.

SlimBox® 64F (DGOI-C 64)

- » Modular box supporting up to 6 compact 1x8 splitters;
- » Supports up to 64 homes passed (HP) and 48 homes connected (HC);
- » Easy subscriber management;
- » Splice and activation in separate areas.

SlimBox® MDU 48F Building distribution point up to 48 connectors

EZ-Peel™ Cable (1f)

- » EZ-Peel™, UV stabilised outer sheath
- » B2ca CPR rated inner and outer sheath
- » Transitions easily from outdoor to indoor eliminating multiple cables
- » Ideal for MDU and SFU applications

M-Pack® Indoor/Outdoor MDU Drop Cable (12-24f)

- » Cca CPR rated
- » Uses EZ-Bend® G.657.B3 fibre
- » Robust, staple ready cable allowing direct routing from building exterior into living areas

SlimBox® 12F (CEIP 12)

- » Transition box on the ground floor or on each floor of the building;
- » Compatible with pigtails and splitters;
- » Up to 12 SC-APC connectors.

SlimBox® 24-Fiber Indoor/Outdoor Enclosure

- » Accommodates LC/SC Adaptors
- » Connects distribution cables to FTTx network drop cables
- » Supports fully plug and play
- » Connections throughout MDU - Floor to Floor Distribution

3 mm Optical Patch Cord

- » Robust construction patch cord;
- » With bend insensitive fiber.

Pre-terminated MDU Solution

Quick and easy installation with a single fiber cable for connection between floors. Combine unbalanced and balanced splitters for a new installation and maintenance experience.

Solution benefits

Growth on demand: optimize your cashflow, use only when needed.

Plug and play pre-terminated solution.

Network Expansion: Flexibility and agility to activate new subscribers.

Compact Solution: Easily adjustable to any MDU scenario.

CEIP 08 Floor Box

- » Fast and Easy Installation;
- » Small Size with 10x10 cm;
- » Plug & Play Solution;
- » Small 1F Riser Cable;
- » Field connect or pre-connect.

EZ!Bend Indoor Drop Cable

Universal Optical Field Connector SM SC-APC FLAT

- » Simple, quick and easy installation;
- » Excellent optical and mechanical performance;
- » Low insertion loss: typical < 0.3 dB.

Micro Indoor LowFriction Cable

1F RISER CABLE

- » 3.0 and 4.8 ruggedised cordage;
- » Double the performance of G.657.B3, reliable down to 2,5 mm radius;
- » Pre-terminated.

CEIP 12 Basement Box

GOCLICK

FTTR Fiber to the Room Solution

InvisiLight™ Facade Solution

- » IP55 Rated
- » Stores up to 4 metres of cable
- » Supports 4 SCA or LCA adaptors
- » Supports up to 4 Customer Drops
- » Wall-Mount inline enclosure to support customer drops at MDUs or Multi-business locations.

InvisiLight™ ILU (Indoor Living Unit) Solution

- » Fast, easy installation

InvisiLight™ MDU (Multi-Dwelling Unit) Solution

- » Transition to the living unit
- » 2.0 or 2.3 mm white cord, up to 16 fibers
- » Pre-connectorized or bulk reel-in-box
- » Water-soluble, safe, adhesive
- » Fast, easy installation
- » OFS award-winning EZ Bend®
- » Optical Fiber, better than ITU G.657B3, 2.5 mm bend radius
